PROFILE

Fullstack Developer with 4+ years of professional experience, specializing in .NET backend development, while also possessing strong capabilities in mobile development using Flutter and React JS. Proven ability to handle end-to-end application lifecycle, from database design and API development to mobile app deployment. Demonstrated success in building scalable, high-performance systems and cross-platform mobile solutions in banking, insurance and enterprise environments.

SOFT SKILLS

- Critical Thinking
- Project Management
- Team Collaboration
- Public Speaking
- Problem Solving
- Time Management

WORK EXPERIENCE

MAY 2022 - AUGUST 2025

PT. INDOCYBER GLOBAL TEKNOLOGI

.NET & Flutter Developer – Client: PT. Bank Negara Indonesia (BNI)

- Assigned to BNI as part of the Scoring Loan Origination System / Retail Enabler Delivery team.
- Designed and developed backend services using ASP.NET and C#.
- Built and deployed mobile apps using Flutter, integrated REST APIs, and implemented push notifications.
- Integrated middleware between third-party apps and internal loan systems.
- Maintained, tested, and deployed multiple modules including Fleksi eChannel and Digital Loan.
- Created reporting automation and maintained operational support with business units.
- Collaborated with business analysts and QA teams for requirement analysis and UAT.
- Developed high-performance API services for Digital Fleksi project, including:
  - Designing scalable API service architecture.
  - Building database schema and stored procedures.
  - Ensuring services could handle high concurrency and large-volume request traffic.

TECHNICAL SKILLS

Languages & Frameworks:
- C#, ASP.NET, Flutter, Dart, Node.js, Express.js, React.js, Go

Database:
- SQL Server, Oracle, SQLite, Postgres

Tools & DevOps:
- Git, GitHub, GitLab, Docker, Jenkins, CI/CD pipelines

Concepts:
- API Development, Microservices, Background Services, RESTful Architecture, High-Concurrency Systems, Cross-Platform Mobile Development

EDUCATION

Indraprasta PGRI University

Bachelor's Degree in Informatics

2017 – 2021 | GPA: 3.41 / 4.00

LANGUAGES

- Bahasa Indonesia (Native)
- English (Basic – Working Knowledge)

AUGUST 2025 - PRESENT

PT. DIGITAL TECH ASIA

Fullstack Developer – Client: PT. Mandiri Inhealth

- Assigned to Mandiri Inhealth as part of the System Developer team.
- Designed and developed with React Js and ASP.Net Core.
- Created reporting Insurance Product and maintained operational support with business units.
- Collaborated with business analysts and QA teams for requirement analysis and UAT.
- Developed high-performance API services for New Actuw, Extend Polis and IFRS17 project, including:
  - Designing scalable API service architecture.
  - Building database schema and stored procedures.
  - Ensuring services could handle high concurrency and large-volume request traffic.

PROJECT HIGHLIGHTS

- **Digital Loan Fleksi:** Designed and developed scalable service APIs and database architecture to handle high-volume requests via Mobile Banking.
- **LMS Retail:** Data migration and integration with CMS from legacy systems.
- **WebChannel:** Developed scoring fronting products with automation and reporting.
- **SmartDigi:** Maintained vendor-coordinated digital onboarding system.
- **eLO Bridging:** Bridged middleware between 3rd party and consumer loan systems.
- **BNI Move App:** Developed cross-platform mobile app using Flutter, implemented geotagging via Google Maps API and push notifications using Firebase.
- **BeSmartKu App:** E-commerce mobile app built using Flutter, with state management, API integration, and Play Store deployment.
- **RodaBundar App:** Rent motorcycle mobile app built using Flutter, with state management, API integration.
- **New Markis:** Designed and developed a scalable web application, application programming interface (API) services, and database architecture to handle high-volume requests in the insurance application process.
- **New Aktuw:** Designed and developed scalable web applications, application programming interfaces (APIs), and database architectures to handle high-volume requests in accounting, approval, and calculation processes for health and non-health insurance products.
- **Extend Polis**: Designed and developed scalable web applications, application programming interfaces (APIs), and database architectures to handle high-volume requests in accounting, approval, extend polis contract Insurance and calculation processes for health and non-health insurance products.
- **Coinsuirance**: Designed and developed scalable web applications, application programming interfaces (APIs), and database architectures to handle high-volume requests in calculation processes report IRFS17 for health and non-health insurance products.
- **Reinsurance**: Designed and developed scalable web applications, application programming interfaces (APIs), and database architectures to handle high-volume requests in calculation processes report IRFS17 for health and non-health insurance products.
